FLIR B Series

FLIR B620

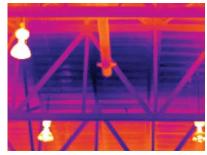

Ideal for building inspections

FLIR B620 is a high performance infrared inspection system specially developed for building applications including automatic humidity and insulation defects alarm. With its state of the art technology including a 640x480 detector it produces sharp detailed images. Its unique ergonomic design makes it convenient to work with during inspections. The camera is equipped with the standard 24° lens.

- Image resolution 640 x 480
- Sensitivity 40 mK
- Automatic Humidity alarm
- Automatic Insulation defects alarm
- Large high resolution 5.6" flip-out
 LCD
- Tiltable high resolution viewfinder
- High performance lenses with USM technology
- 1-2 times continuous zoom with pan
- Picture in Picture
- Thermal fusion: above, below interval

- Rotatable handle for convenient operation
- Built-in 3.2 Mpixel digital camera with target illuminator
- Standard temperature range -40 °C to 120 °C
- Periodic storage
- Panorama
- Voice and text annotation
- MPEG-4 streaming to PC using USB
- Programmable buttons
- User profiles

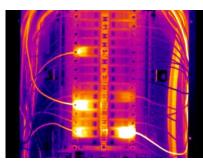

Roofing

Residential and Commercial Construction

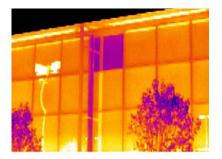

Building insulation needs are similar in residential and commercial construction. The roof, floor, and walls, are the common places for insulating against heat loss or for heat containment. With correctly installed insulation, businesses with large facilities or multiple facilities can make significant savings on energy bills.

Locating the source of the inefficiency in energy use is the first step in cutting energy costs

Energy audits of buildings are becoming increasingly popular as more companies look to establish their green credentials and save money at the same time. Infrared Thermography for building inspections shows what the eye cannot see.

Difference temperature	Delta temperature between measurement functions or
	reference temperature
Reference temperature	Manually set or captured from any measurement function
Emissivity correction	Variable from 0.01 to 1.0 or selected from editable materials list
Measurement corrections	Reflected temperature, optics transmission, atmospheric
	transmission and external optics
Humidity alarm	1 humidity alarm, including dew point alarm
Insulation alarm	1 insulation alarm
Set-up	
Set-up commands	Configurable measurement tools menu; configure information to be shown in image; 2 Programmable buttons; user profiles; local adaptation of units, language, date and time formats
Storage of images	
Image storage	Standard JPEG, including measurement data, on memory card
Image storage mode	IR / visual images; simultaneous storage of IR and visual images Visual image is automatically associated with corresponding IR image
Periodic image storage	Every 10 seconds up to 24 hours
Panorama	For creating panorama images in FLIR Reporter Building
