FLIR P Series

FLIR P660

The High Performance infrared inspection system

FLIR P660 is the highest performing infrared inspection system available. With its state of the art technology, including 640x480 detector resolution and unique ergonomic design it is the natural choice for professional thermographers that want the most efficient instrument producing professional results. There are three standard set available for option:

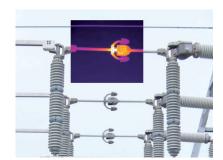

- 1. The camera is equipped with standard 24° lens.
- 2. The camera is equipped with a 12° telephoto lens with 2x higher magnification
- 3. The camera is equipped with a 45° wide angle lens particularly useful when studying large areas at close distance.
- Image resolution 640x480
- Sensitivity 30 mK
- Large high resolution 5.6" flip-out LCD
- Tiltable high resolution viewfinder
- High performance lenses with USM technology
- 1-8 times continuous zoom with pan
- Contrast optimization
- Rotatable handle for convenient operation
- Built-in 3.2 Mpixel digital camera with target illuminator

- Standard temperature range -40 °C to 500 °C
- 1%, 1°C accuracy
- Real time radiometric storage to built-in RAM
- Periodic storage
- Panorama
- Voice and text annotation
- Built-in GPS
- MPEG-4 streaming to PC using USB or FireWire
- Programmable buttons

GPS technology helps to record location information

Fusion, a function that lets you display a part of digital photo as an infrared image.

The P660 includes an integrated 3.2 megapixel camera to aid in reporting. Infrared and visual images taken with the P660 can be stored in standard JPEG formats. The P660 visual camera includes matching Field Of View lenses, so IR and visual images are shown at similar long distances using the same Field Of View.

FLIR Systems FLIR P660 is an affordable easy-to-operate high-

performance infrared camera that delivers accurate temperature measurements at productive and safe distances. This makes the P660 camera an ideal solution for cost-effective and efficient

Infrared inspection helps to detect overheating parts, can avoid costly downtime and maintain plant

FLIR P660 Technical Specifications

Imaging and optical data Field of view (FOV) / Minimum focus	12° × 9° / 1.2 m
distance	12 × 3 / 1.2 III
Spatial resolution (IFOV)	0.33 mrad
Thermal sensitivity / NETD	30 mK @ +30°C
Image frequency	30 Hz
Focus	Automatic or manual (electric or on the lens)
Zoom	1–8× continuous, digital zoom, including panning
Focal Plane Array (FPA) / Spectral range	Uncooled microbolometer / 7.5–13 µm
IR resolution	640 × 480 pixels
Image presentation Display	Ruilt in widecareen F.6 in LCD 1024 v 600 pixels
Viewfinder	Built-in widescreen, 5.6 in. LCD, 1024 × 600 pixels Built-in, tiltable LCD, 800 × 600 pixels
Automatic image adjustment	Continuous / manual; linear or histogram based
Manual image adjustment	Level/span / max / min
Contrast optimization	Automatic, adjustable DDE
Image modes	IR-image, visual image, thumbnail gallery
Reference image	Shown together with live IR image
Measurement	
Temperature range	-40°C to +500°C
Accuracy	±1°C or ±1% of reading for limited temperature range,
Measurement analysis	±2°C or ±2% of reading
Spotmeter	10
Area	5 boxes or circles with max. / min. / average
Automatic hot / cold detection	Max / Min temp. value and position shown within box, circle or on a line
Isotherm	2 with above / below / interval
Profile	1 live line (horizontal or vertical)
Difference temperature	Delta temperature between measurement functions or reference
Deference towns veture	temperature
Reference temperature Emissivity correction	Manually set or captured from any measurement function Variable from 0.01 to 1.0 or selected from editable materials list
Measurement corrections	Reflected temperature, optics transmission, atmospheric transmission
Wedsurement corrections	and external optics
Measurement function alarm	Audible/visual alarms (above / below) on any selected measurement
	function
Set-up	
Set-up commands	Configurable measurement tools menu; configure information to be shown in image; 2 Programmable buttons; user profiles; local adaptation of units, language, date and time formats
Storage of images	
Image storage	Standard JPEG, including measurement data, on memory card
Image storage mode	Built-in RAM for burst recording IR / visual images; simultaneous storage of IR and visual images
	Visual image is automatically associated with corresponding IR image
Periodic image storage	Every 10 seconds up to 24 hours
Panorama	For creating panorama images in FLIR Reporter Building software
Image annotations Voice	
VUICE	
Text	60 seconds stored with the image Predefined text or free text from PDA (via IrDA) stored with the image
